

Recognition

Awarded To

Pulkit Indora

Microsoft Navision is a very complex integration we have where Turvo needs to work with a third party to successfully integrate for a customer. Pulkit and Anil have been instrumental in helping Gampac use Navision. From solutioning to execution and debugging issues when changes have been pushed to sandbox and production environment they have had to go over and beyond to ensure success for Gampac. Special mention to Pulkit who although is relatively early in his career but has been very clear and proactive in his communication while navigating complicated situations due to the nature of the changes and the integration involved. Well done and keep it up
